HERITAGE BUILDINGS

MSMR has a broad range of experience in heritage and conservation projects, encompassing Grade I, Grade II* and Grade II listed buildings. Our portfolio includes residential, commercial, and institutional uses and ranges from minor interventions and sensitive refurbishments through to comprehensive redevelopment and façade retention projects.

Working alongside leading consultants, we combine our in-depth knowledge of architectural history and conservation best practice to find creative solutions for the re-use and adaptation of historic properties.

Our clients include great estates, institutions, commercial developers as well as private individuals. Together we work closely, along with local authorities and statutory bodies, to ensure the best outcome for each project.
