WORKPLACE DESIGN

MSMR brings exceptional workplaces to life, combining expert design, thoughtful detailing, and seamless execution. Whether adapting an existing structure or working within a new-build shell, we create uplifting spaces that respond to the distinct characteristics of each building and the people who will use it.

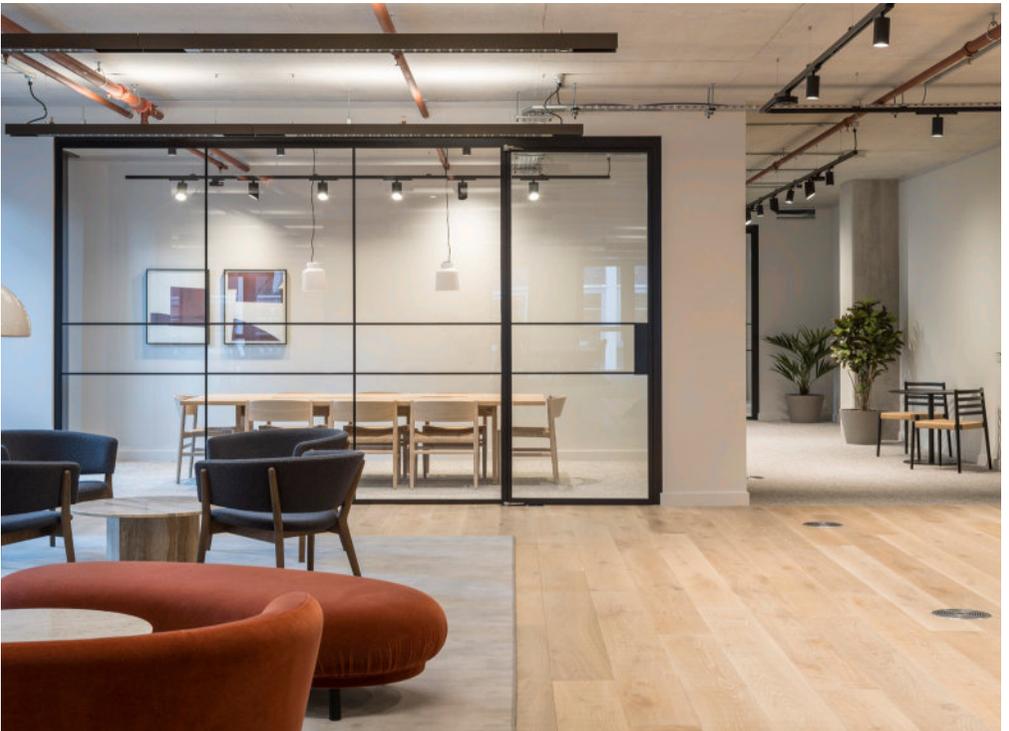

We work with developers, agents, and private clients on both Cat A base build and Cat B fit out projects. Whether delivering a speculative development or an end-user workplace, we carry out rigorous test-fit analysis to maximise flexibility for our clients and target reduced embodied and operational carbon through design. In each case we seek out overlooked opportunities to add value and deliver workplace that are thoughtfully furnished, truly adaptable and enduring.

'MSMR's design outputs are of the highest quality. Their approach on the Bishopsgate Project has been proactive, creative and professional at every stage.'
